

VERTICAL ROTATIONAL SERIES

VERTICAL SERIES FOR HIGH TEMPERATURES

Material: Phosphated steel

Riveted pivots: Phosphated steel

Supporting bushes: Hardened and ground steel.

Performance: With eye bolt clamping lever for inserting the spindle.

Spindles: To be ordered separately (see Accessories on page 76)

Features and applications:

The tools of this series are generally used in rotational forging, as it is able to operate at high temperatures (240-300°C).

This is made possible thanks to their finish, the interposition of special copper grease between the parts and appropriate tolerances between the couplings.
